## PDF Proofs (Portable Document Format - a.k.a. Screen Proofs or Soft Proofs)

Acrobat® allows us to show you PDF proofs. These proofs are not intended for color matching and are produced at a lower resolution for format and type review. It is an economical way to take a final look at your project before we proceed.

### PDF Proofs for Spot Color Printing

Based on the specifications estimated for your job (typically 1 or 2 color), this is your final proof before printing. Errors with fine rules and other elements can go undetected on a PDF proof. *Please check it carefully.*

### PDF Proofs for CMYK Printing

You have specifically requested not to review "Contract" or "Imposition" proofs on an order for which they are recommended. High-resolution Contract and Imposition proofs may reveal color balance, positioning or other errors not detected by a PDF proof. By approving this PDF proof for print production, you release Color Impressions, Inc. of any responsibility for error.

*Please do not hesitate to contact us if you have any questions regarding your job. Check the appropriate box, sign, date and return to us. Upon receipt, we will proceed with the production process.*
